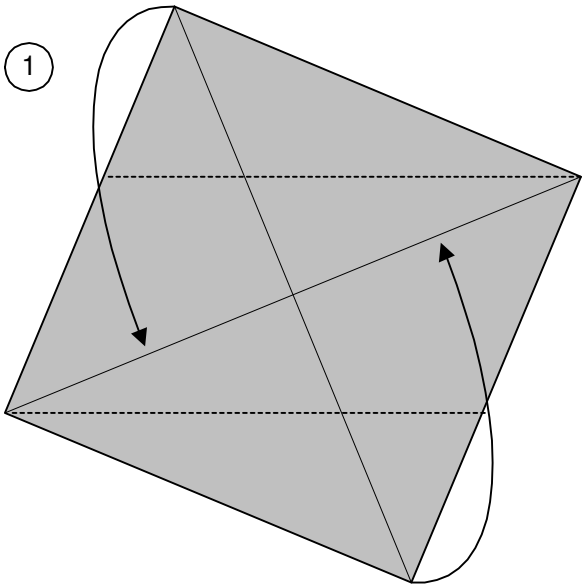
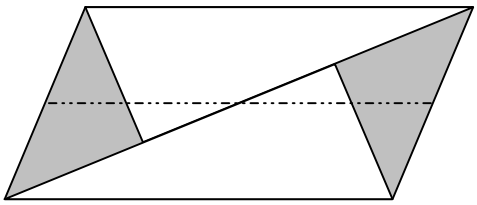
Kawasaki Rose

1



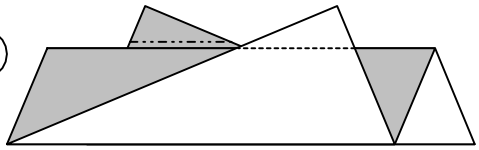
Folding the rose begins with creating a grid on the paper at a 22.5 degree angle, 45 degree/2. Crease diagonals, and with the coloured side up, valley fold left side to the diagonal. Repeat above. It is important to fold the correct side to the diagonal, as shown in the diagram.

2



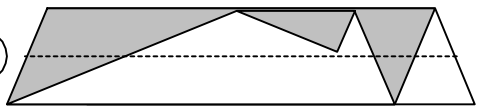
Mountain fold only the bottom layer

3



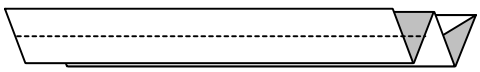
Valley fold the tip of the front layer so that it is flush with the layer behind. Repeat behind.

4



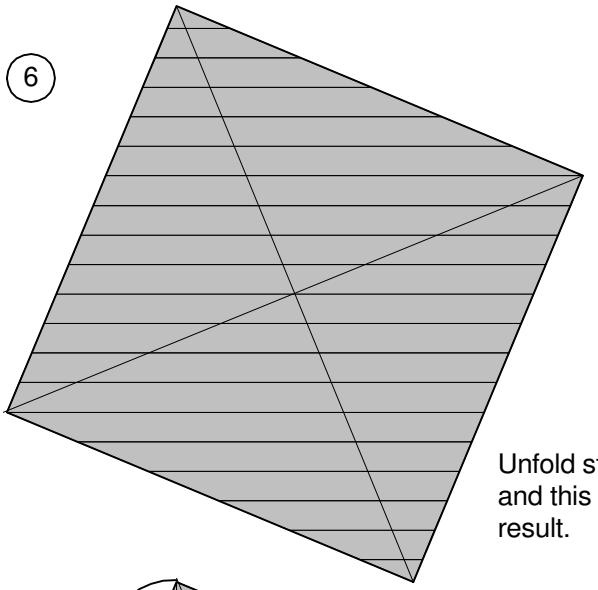
Valley fold/unfold first two layers of paper. Repeat behind

5



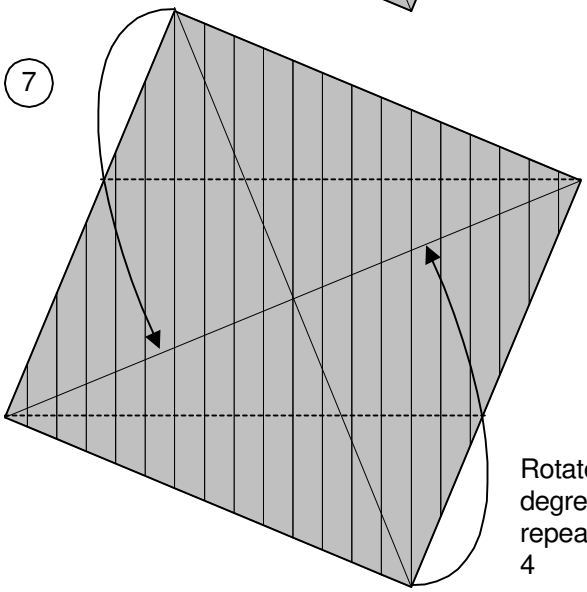
Valley fold/unfold first four layers of paper. I recommend that the folder fold at most two layers of paper at a a time to avoid paper drift. The type of fold (valley or mountain) is unimportant at this point in folding

6



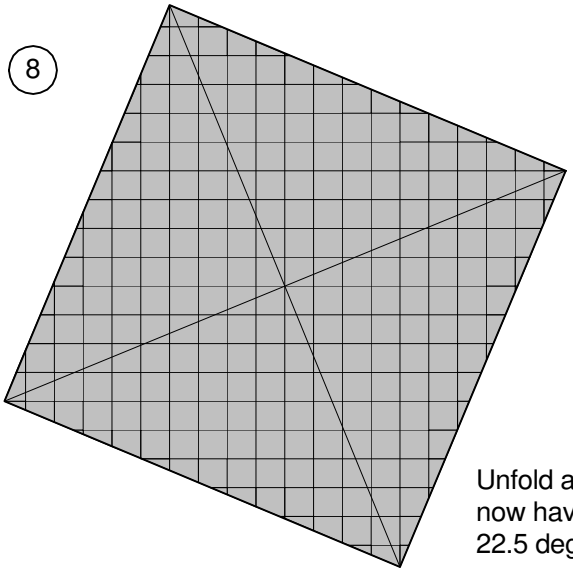
Unfold steps 1 to 4 and this is the result.

7



Rotate 90 degrees and repeat steps 1 to 4

8



Unfold and you should now have a grid on a 22.5 degree angle.
